

LONGVIEW POWERPLANT

MAIDSVILLE, WV

BY THE NUMBERS

PROJECT FACTS

Location: **Maidsville, WV (Morgantown)**
Type: **769MW Grassroot Coal Power Plant**

MAXIM FACTS

Project Duration: **2007 to 2010**
Total Contractors: **11**

CRANE STATS

- Conventional Crawler: 11
 - All Terrain/Hydraulic Truck: 7
 - Rough Terrain: 17
 - Boom Truck: 2
 - Carry Deck/Down Cab: 7
- On Site Total 44**

THE PROJECT: Longview Power is a 769 MW nameplate supercritical coal-fired power generating facility. When complete, Longview is expected to be among the cleanest and most efficient coal-fired plants in the U.S., utilizing a highly efficient boiler design and the best available pollution control technology to minimize air emissions. Its location at the mine mouth gives Longview access to an efficient, low-cost coal supply. Longview Power is majority owned by First Reserve Corporation, one of the world's leading private investment firms in the energy industry. (Source: www.longviewpower.com)

The scope and scale of this project required the comprehensive lift solutions that only a company with Maxim's resources can provide. This included over 40 operated and maintained cranes of various types and sizes. In addition, Maxim provided project planning, project engineering, and industry leading safety practices for the duration of the project.

RESULTS: Over 175,000 hours of work completed without a major safety incident.
